Dear Mr. Grigalauski:

This letter is in response to your request informing you that Ecology and Environment, Inc. (E & E) has been requested by the U.S. Environmental Protection Agency to perform a site inspection and sampling at your C10-K3 Landfill in Kankakee, Illinois on May 2, 1984.

E & E has been retained by the U.S. EPA under contract 68-01-6692 for the purpose of evaluating candidate sites for the National Priorities List under the Comprehensive Environment Response Compensation and Liability Act, better known as Superfund. As part of our evaluation, the U.S. EPA has asked us to perform an on-site inspection of your landfill and any other hazardous waste areas you might have at the Kankakee site. They have also requested that sampling be allowed if it would help us better assess the site.

We would like to conduct priority pollutant sampling on four of your groundwater monitoring wells (G101, 2A(G12S), 3A(G13SR) and 4A(G14S). Samples will consist of the following:

- 1) two 1/2 gallon glass bottles and two 40 ml glass VOA vials for organics,
- 2) one (1)-liter high density polyethylene bottle for metals.

One sample for each well with a blank and a duplicate for a total of six samples. We plan to use stainless steel bailers that will be decontaminated with acetone and distilled water after each sample. The wells will be purged prior to sampling.

These will be low concentration samples that will be sent to an EPA contract lab, and you will be given a receipt for each sample taken.

EPA Region 5 Records Ctr.

I am including a site inspection form which we fill out and submit to the U.S. EPA. All questions we ask you will directly come from this form. Therefore, if you have any documents that could help us answer these questions, we would appreciate reviewing them.

Also, enclosed is a copy of the confidentiality form used by Ecology and Environment, and a letter of introduction provided by U.S. EPA to each of our employees engaged in field investigation work which outlines the statutory basis for such inspections.

To verify this date or if you need further information, please call me at (312)663-9415. Thank you for your cooperation.

Sincerely,

Kenneth G. Krueger
